Art Unit: 1614

Applicant's election without traverse of Group II in Paper No. 8 is acknowledged. To further prosecution applicants are requested to cancel the non-elected invention.

In view of applicants' argument the rejection under 35 U.S.C. 112, second paragraph is withdrawn.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 25-27 are again rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 22-24 of prior U.S. Patent No. 6,239,164. This is a double patenting rejection.

Applicants' arguments have been considered but are not persuasive. In view of the disclosure in the specification on page 4 it is inherent that the instant compounds are non-immunosuppressive and have an affinity for FKBP-type immunophilins.

If the instant claims are amended as proposed by the applicants an obviousness-type double patenting rejection would be made.
